## THE ANNUAL REPORT ON TRACEABILITY

### PKO-based feedstocks

Year	Traceability to refineries and crushers [%]	Traceability to mills [%]	Traceability to plantations [%]
2020	100	100	26
2021	98	not reckoned	not reckoned
2022	96	94	66
2023	100	99	87
2024	98	98	90
2025	97	97	93

#### Methodology for Calculating Traceability Scores

The traceability score is calculated as the percentage of total deliveries that are traceable. This share is then applied proportionally to overall supply, resulting in a score that reflects the extent of traceability coverage across the supply chain.
